

# MSc

## Master of Science Global Health and Development

**Lead the  
World to a  
Healthier  
Future**

**PBRU International**  
**Phetchaburi Rajabhat University**

## Why Study Global Health and Development?

Global health is a field that integrates expertise and perspectives from different disciplines based on the determinants of health that have a complex structure in the globalizing world. It provides a new platform for research, education, and information about the health problems facing the world. Global health work focuses largely on health issues that go beyond the borders of nations, health policies, health inequalities, migration, violence, global climate crisis, urbanization, demographic change, pandemics, new and re-emerging infectious diseases such as COVID-19, HIV, malaria, and tuberculosis, non-communicable diseases, etc. It brings together many different disciplines and requires an multidisciplinary approach.

## Why Study with Us @ PBRU?

The PBRU International offers a multidisciplinary approach to studying global health and development. The students will work together with instructors, researchers, leaders, policy makers etc. from a variety of disciplines and be taught and supervise by experts from several of Phetchaburi Rajabhat University. The course will be including foundation of global health concepts, diversity of global health and development concepts such as politics and governance, leadership and management, economics, social determinants of health, health promotion and epidemiology. Moreover, our program will not only provide you the classroom but also a various form of teaching and learning methods including seminars, flipped classroom, simulation-based learning, case analysis, research synthesis, fieldtrip and so on.
